GripTape Snapshot

GROWTH & DEVELOPMENT
97% know more about their own strength areas and where they want to keep learning and improving
100% are interested in pursuing additional topics for designing and leading their own learning
94% are more likely to put forth their best effort when completing tasks

"What excites me about GripTape is that I don’t have to follow a leader, instead, I can become one." — Abigail

SELF-REFLECTION
91% are more likely not to give up even if a task is hard
88% are more likely to work hard to do well even if they don’t like a task
88% are more likely to assess quality of their work and make improvements

"I am most excited about GripTape because, through this journey, I was able to prove to myself that I am capable of directing my vision." — Mikayla

MOTIVATION
47% reported it was hard to stay motivated during the Challenge; 50% said there was a point where they lost motivation or felt unsure about completing the Challenge
But they kept going because:
100% -- Desire to demonstrate to myself what I can accomplish on my own
97% -- Desire to pursue something that is important to my future
85% -- The opportunity to explore a topic that I didn’t have another pathway to explore
91% -- The desire to pursue a problem I care about solving

"Me being able to have total control over the whole process was a life saver. It gave me a sense of independence which was an experience within itself." — Kevante

SUCCESS & FUTURE
100% gained knowledge and skills valuable for their futures
86% accomplished the goals they set out to achieve in the Learning Challenge
97% self-assessed their Challenge as a success

"Some of the greatest factors that contributed to my success was [knowing] that I am doing this by myself and this challenge is led by me. It is very exciting to do something you want to do without any teachers telling you to." — Fatumata
